

2.0 MR-Eye: Towards a consensual Magnetic resonance Imaging protocol of the Human Eye

Healthy volunteers wanted

For a study involving MRI for eyes

We're looking for volunteers:

- Between 18 and 65 years old, healthy, with no ongoing relevant somatic or psychiatric illness under treatment.
- No contraindications for magnetic resonance imaging (MRI), i.e. no claustrophobia, no metal implants or pacemaker, no epilepsy, not pregnant.
- No history or current neurological or visual disorders, and no myopia greater than -6 diopters.

For participation in a magnetic resonance imaging (MRI) study.

The study involves a 1-hour visit:

- At Center for Biomedical Imaging (CIBM) at CHUV, participants will receive compensation of CHF 25.00 per hour (total CHF 25.00).
- The tests and measurements in this study are non-invasive.
- All data will be treated confidentially. Participation in the study offers no medical benefit to the participants.

Technique Used

- Magnetic Resonance Imaging (MRI).
